

31. (NEW) Apparel to be worn by a person, comprising:

Sub C17
a panel formed of a fabric layer and a display layer attached to said fabric layer and formed of a material suitable to generate electronic images responsive to electrical signals, said panel being flexible; and
a control member generating said electrical signals for said display layer.

Sub B1
32. (NEW) The apparel of claim 31 further comprising a memory arranged to hold data associated with images, said control member being coupled to said memory to receive said data to generate said electrical signals.

33. (NEW) The apparel of claim 31 further comprising a securing member arranged to secure said panel on the body of said person.

34. (NEW) The clothing apparel of claim 31 wherein said display layer is integrally incorporated into said panel.

35. (NEW) The clothing apparel of claim 31 wherein said display layer is formed of a light emitting polymer.

Sub B1
36. (NEW) The clothing apparel of claim 31 wherein said display layer is constructed to and arranged to show color images in response to said signals.

37. (NEW) The clothing apparel of claim 31 wherein said control member generates electrical signals defining a static image on said display layer.

38. (NEW) The clothing apparel of claim 31 wherein said control member generates electrical signals defining a dynamic image on said display layer.

39. (NEW) The clothing apparel of claim 31 further comprising a memory arranged to store several images, and a selection member coupled to said control member to select one of said images for display by said display layer.

40. (NEW) The clothing apparel of claim 31 wherein said control member generates signals defining a monochromatic image on said display.

41. (NEW) The clothing apparel of claim 40 wherein said monochromatic image is a uniform color.

42. (NEW) The clothing apparel of claim 40 wherein said control member generates signals defining an image composed of alphanumeric characters.

43. (NEW) The clothing apparel of claim 31 wherein said panel is sized and arranged to form part of a vest.

44. (NEW) The clothing apparel of claim 31 wherein said panel is sized and arranged to form part of a shirt.

45. (NEW) The clothing apparel of claim 31 wherein said panel is sized and arranged to form part of a cap.

46. (NEW) The clothing apparel of claim 31 wherein said panel is sized and arranged form part of a tie.

47. (NEW) The clothing apparel of claim 31 wherein said panel is sized and arranged to form a part of a pair of suspenders.

48 (New). The clothing apparel of claim 31 wherein said panel is sized and arranged to form a part of a belt.

49. (NEW) Apparel for a wearer comprising:
a clothing article constructed and arranged to be worn on the body of said
wearer, said clothing article including a panel with a fabric layer;
an electronic display layer attached to said fabric layer, said fabric and
electronic display layer being flexible, said electronic display layer being arranged and
constructed to generate images in response to electrical signals; and

Sub E1
a control member coupled to said electronic display layer and arranged to generate said signals.

50. (NEW) The apparel of claim 49 wherein said electronic display layer is formed from a light emitting polymer.

Sub E1
51. (NEW) The apparel of claim 49 further comprising a memory storing data defining said images.

Boat
52. (NEW) The apparel of claim 51 wherein said memory is replaceable.

53. (NEW) The apparel of claim 51 wherein said memory is arranged to hold data corresponding to several images and wherein said controller includes an image selector for selecting one of said images to be displayed.

54. (NEW) The apparel of claim 53 wherein said image selector includes a timer to generate a timing signal and wherein said electronic display layer shows images in accordance with the said timing signal.

55. (NEW) The apparel of claim 53 wherein said image selector includes a keyboard for identifying an image to be displayed.

56. (NEW) The apparel of claim 49 wherein said display images formed of alphanumeric characters.

57. (NEW) The apparel of claim 56 further comprising a message selector cooperating with controller to select a message defined by said alphanumeric characters.

58. (NEW) The apparel of claim 57 wherein said message selector includes a keyboard for entering said alphanumeric characters.

59. (NEW) The apparel of claim 57 wherein said message selector includes an interface receiving external signals from an external device, said external signals defining said message.

60. (NEW) Apparel for a wearer comprising:

a clothing article constructed and arranged to be worn on the body of said wearer, said clothing article including a panel forming an electronic display, said panel being flexible; and

a control member coupled to said electronic display and arranged to generate signals corresponding to images shown on said electronic display.

61. (NEW) Apparel for a wearer comprising:

a clothing article constructed and arranged to be worn on the body of said
wearer, said clothing article including a panel formed of a light emitting polymer
arranged to generate and display images in response to electrical signals; and
a control member coupled to said panel and arranged to generate said
electrical signals.

62. (NEW) Apparatus for playing a war game comprising:

a clothing article constructed to be worn by a participant in said war game;
a flexible display formed on said clothing article and arranged to display
selectively one of a plurality of images;
a controller generating signals for said display, said signals defining said
images; and
a gun coupled to said controller, said gun generating a beam when
activated by said participant.

63. (NEW) The apparatus of claim 62 wherein said gun is coupled to said
controller.

64. (NEW) The apparatus of claim 62 further comprising a sensor sensing hits
on said participants from other participants.
